Overview of Jackfruit Network

Founded in 2021, Jackfruit Network is a Nairobi-based education social enterprise that empowers low-fee private schools through its three arms

Overall Problem Statement

1 **“Impact” is measured, but does not yet point toward contribution**

JFN cannot isolate what changes are caused by loans, procurement, or training

2 **Data is strong up-front, but weakens over time**

Onboarding and lending period data is robust; long-term outcome tracking is limited and uneven

3 **Late-stage data relies on close engagement with schools**

Continuous data depend on school relationships, making accuracy / consistency hard to manage

4 **The loop between data and school behavior isn't closed**

Data hasn't yet fully translated into feedback and incentives that drive school improvement

Agenda

Executive Summary

- ❖ Overview of Jackfruit
- ❖ Methodology
- ❖ Key Findings

Solution Deep Dive

- ❖ Impact Survey
- ❖ Interim Check-in
- ❖ School Engagement
- ❖ SSL Interactions

Next Steps

Overall Methodology and Process

Weeks 1 - 7

Scoping and Problem Discovery

Define scope and understand current data collection process and challenges

Field Work

Onsite Interviews

Gather feedback from schools and School Support Leads (SSLs)

Weeks 8 +

Prototyping and Validation

Prototype solutions and obtain buy-in from various JFN teams

Interviews

Impact Investors (N=3)

JFN Data Team

School Directors (N=13)

JFN SSLs (N=5)

JFN Teams

Data / Tech (N=3)
People (N=2)
Marketing (N=1)

Industry Experts (N=3)

Analysis of internal documentation

Secondary research

School Interviews Breakdown

Yale interviewed 13 school directors to understand SSL interaction, data collection, important metrics, and potential incentives. This sample is largely representative of JFN's portfolio with some skews to more urban schools

Jackfruit's School Portfolio

66% Digital¹

58% ≤ 10,000 KES per term

40% Urban
45% Peri-Urban
15% Rural

Schools Interviewed (N = 13)

58% Digital

70% ≤ 10,000 KES per term

67% Urban
25% Peri-Urban
8% Rural

¹Using digital recordkeeping for attendance or test scoring per Impact Survey

Agenda

Executive Summary

- ❖ Overview of Jackfruit
- ❖ Methodology
- ❖ Key Findings

Solution Deep Dive

- ❖ Impact Survey
- ❖ Interim Check-in
- ❖ School Engagement
- ❖ SSL Interactions

Next Steps

Key Findings

Current State

Data Collection Process

Non-Digitally Enabled

- **Manual** data extraction
- Data sharing is informally conducted **in person or by phone**

Digitally Enabled

- **Quick digital access** to requested metrics
- Data sharing is preferred **by email or online portals**, but is often still conducted informally

SSL Engagement

Regular check-ins with school

Check-in frequency and level of prep varies

No central repository to track updates

Performance indicators

- ❖ Infrastructure / hygiene
- ❖ Transportation

- ❖ Academics / teachers
- ❖ Behavior and discipline

- ❖ Technology
- ❖ Co-curriculars

Incentives Mentioned

Performance-based rewards

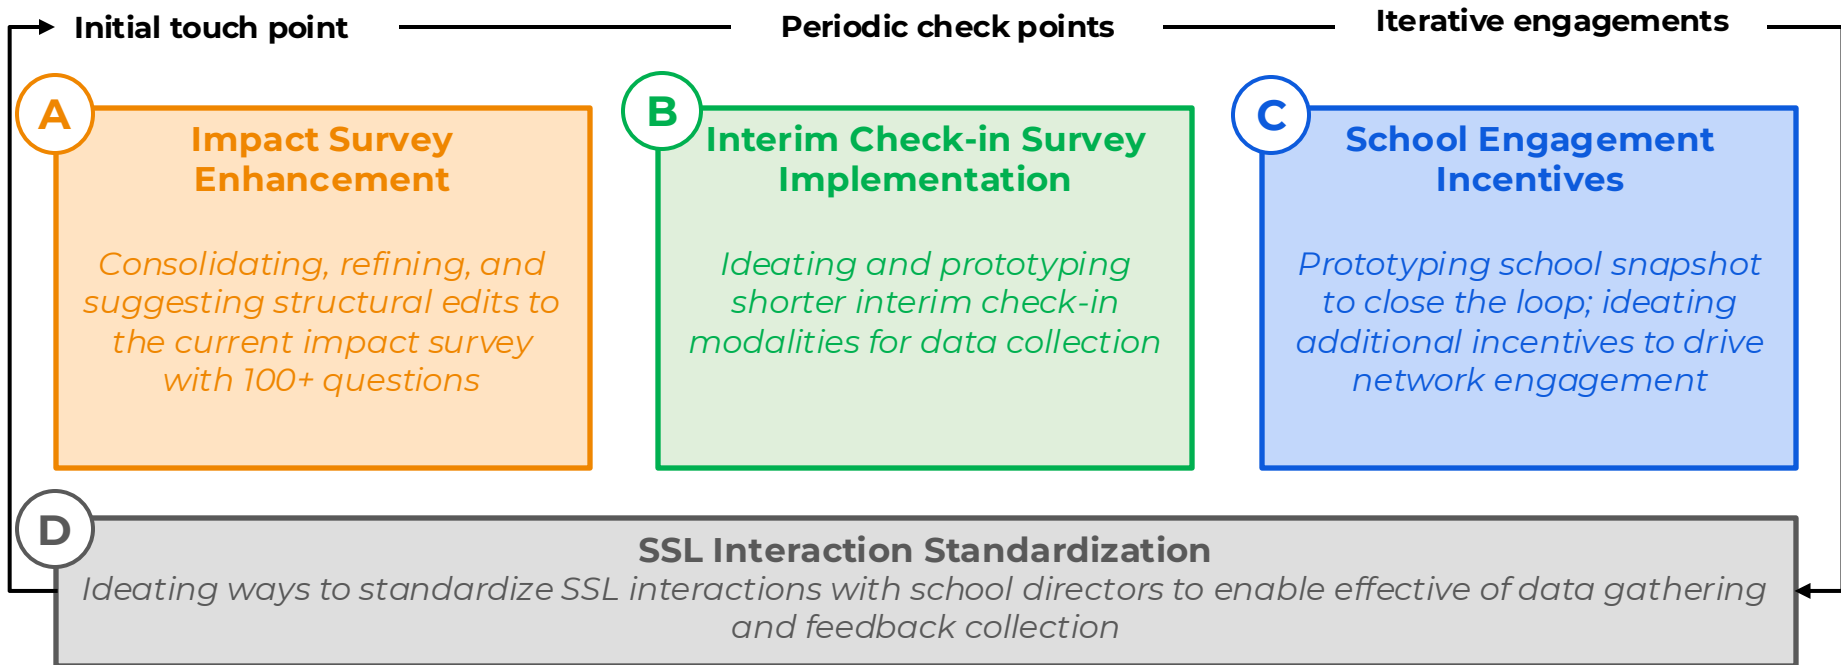

Trainings & advice for instructors

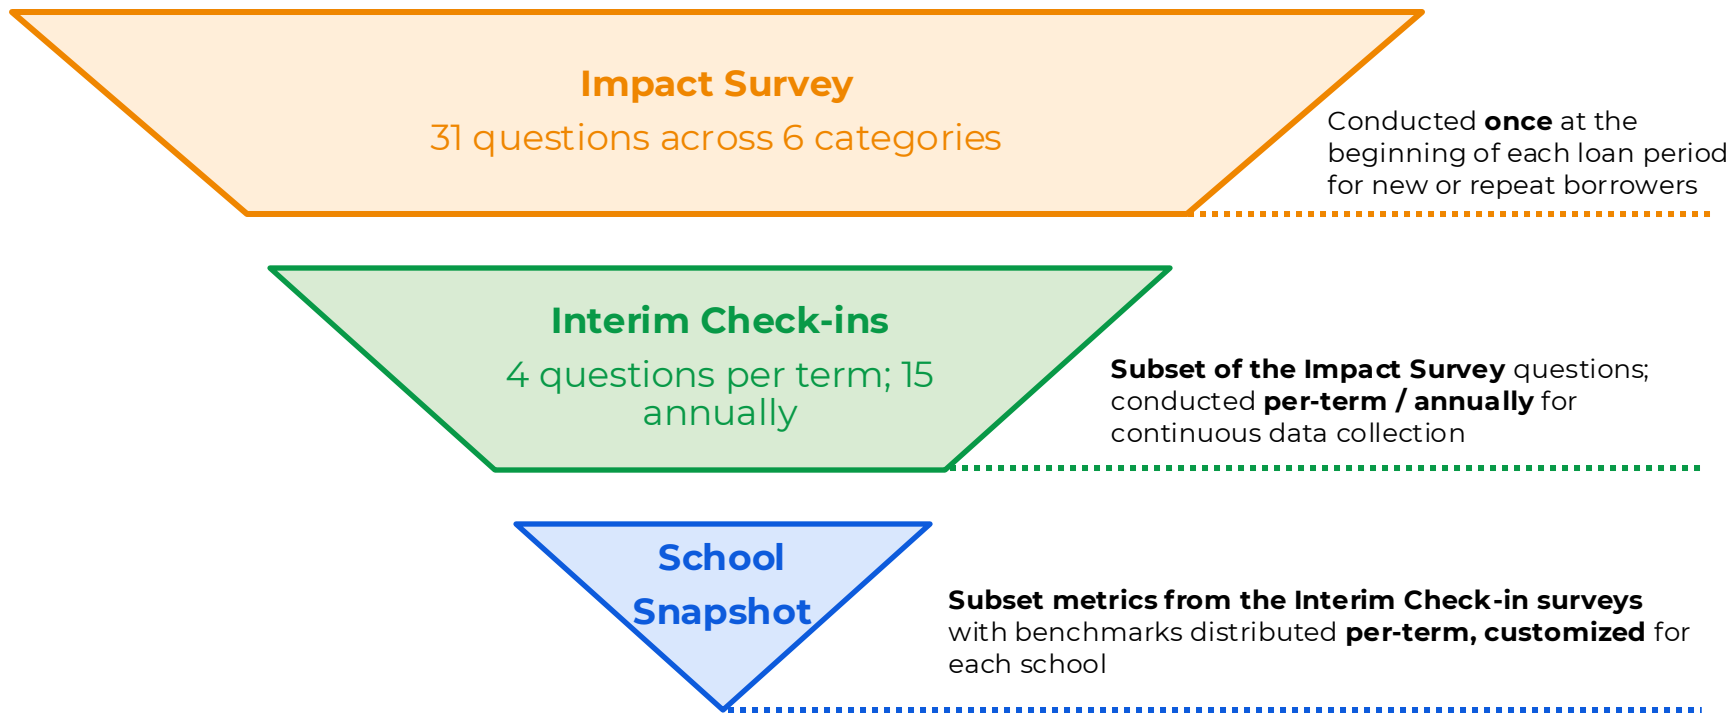

JFN Network events for students

Key Recommendations

Proposed Data Collection Process

Agenda

Executive Summary

- ❖ Overview of Jackfruit
- ❖ Methodology
- ❖ Key Findings

Solution Deep Dive

- ❖ Impact Survey
- ❖ Interim Check-in
- ❖ School Incentives
- ❖ SSL Interactions

Next Steps

Impact Survey: Overall Approach

1

Prioritized survey questions based on:
Relevance, Actionability, Magnitude

2

Evaluated critical questions to retain based on external reporting needs

3

Enhanced structure of key questions for efficiency

Impact Survey: Before and After

Pre-Enhancements:

100+ survey questions

Not integrated with other loan application processes

No dynamic interface

No data integrity checks

Post Enhancements:

31 key questions across 6 categories

School profile pre-filled based on loan app

Respondents only see relevant questions

Data validation to mitigate erroneous input (e.g., totals auto-populated)

Agenda

Executive Summary

- ❖ Overview of Jackfruit
- ❖ Methodology
- ❖ Key Findings

Solution Deep Dive

- ❖ Impact Survey
- ❖ Interim Check-in
- ❖ School Engagement
- ❖ SSL Interactions

Next Steps

Interim Check-in: Overall Approach

1

Cost and benefit of potential delivery methods

2

Prioritized metrics to measure based on school and partner interviews including Finances & Sustainability, Access, Facilities, Learning Outcomes

3

Prototyped structure for annual and per term check in

Interim Check-in: Delivery Modality

Our Approach: Evaluating three survey distribution options from interviews and school field visits

Recommendation: Piloting via SSL App and then launching on WhatsApp after 1-2 terms

Criteria		SSL App	WhatsApp	USSD (Deprioritized)
Set up effort	Cost	Low - Free set up - No additional scaling costs	Medium - Free set up (existing data infra) - Cost per message	High - Shared code - Registration fee & costs per session - Monthly hosting
	Set up time	Low - Set up: 1 week - Data integration: N/A	Medium - Set up: 2-3 weeks - Data integration: N/A	High - Set up: 4 weeks - Data integration: 1 month
User experience	Barriers to access	Medium Easy access for SSLs; explore public in-app link for schools	Low Many schools communicate via WhatsApp already	Low No wi-fi/data needed
	In-survey friction	Low - Medium - App has prompting mechanism for SSLs - Customization available	Low - Medium - SSL has ability to step in 24-hr human conversation window	High 30 second time out - No human facilitation - Interface may feel clunky

Interim Check-in: Priority Metrics

Category	Metric	Format	Frequency	Initial Data Source
Finances and Sustainability	Loan Purpose	Select all that apply	Annual	Jackfruit DB
	Ownership vs. Rental of Land	MCQ	Annual	Financial Survey
	Ownership vs. Rental of Building	MCQ	Annual	Financial Survey
Access	Student Enrollment by Gender	Numerical Input	Each Term	Impact Survey
	Student Transfers In	Numerical Input	Each Term	Impact Survey
	Student Transfers Out	Numerical Input	Each Term	Impact Survey
	Student Attendance	Percentage Input	Each Term	-
	Number of Classrooms	Numerical Input	Annual	Impact Survey
	Avg. Capacity of Classroom	Numerical Input	Annual	-
	Grade Levels Offered by School/New Grade Levels	Select all that apply	Annual	Financial Survey
Facilities	Quality of Classrooms	Likert Scale (1-5)	Annual	Impact Survey ("school building")
	Quality of Washrooms	Likert Scale (1-5)	Annual	Impact Survey
	Comments on other facilities that apply	Text input	Annual	-
Learning Quality and Outcomes	Teacher Breakdown by Gender	Numerical Input	Annual	Impact Survey
	Teacher Retention	Percentage Input	Annual	Impact Survey
	External Assessment Score Breakdown by Performance Level	Percentage Input	Annual	Impact Survey
	Number of Students for Each Pathway in end of Grade 9	Numerical Input	Annual	-
	New Extracurriculars Offered	Text Input	Annual	Impact Survey

Interim Check-in: SSL App Prototype

Loan Purpose & Ownership of Land

Facilities like # and quality of classrooms

Annual check-in

Finances & sustainability

F1 Loan purpose Multi-select

F2 Land ownership MCQ
☒ Owned ☐ Rented ☐ Other

F3 Building ownership MCQ
☐ Owned ☒ Rented ☐ Other

Access

A1 Number of classrooms Numerical
 classrooms

A2 Avg. classroom capacity Numerical
 students

A3 Grade levels offered Multi-select

A4 % of students on sponsorship % input
 % of total enrollment

Term check-in

Term 1 **Term 2** **Term 3**

Access

T1 Student enrollment by gender Numerical

Level	Male	Female	Total
Playschool			—
Pre-Primary			—
Primary			—
Secondary			—
Total	—	—	—

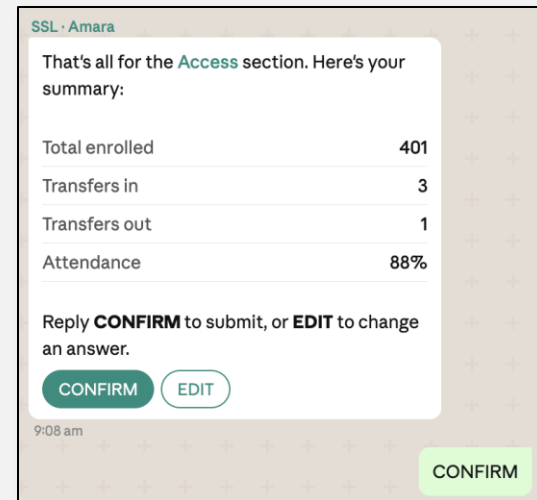

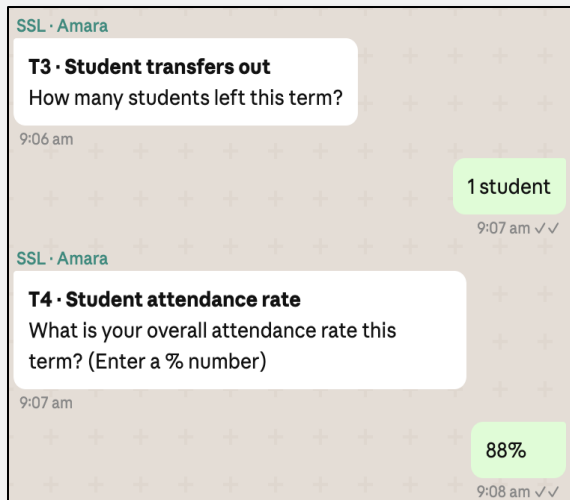

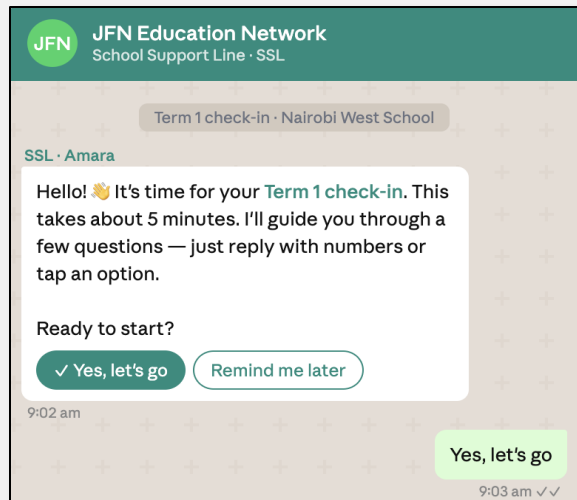

T2 Student transfers in Numerical
 students

T3 Student transfers out Numerical
 students

T4 Student attendance rate % input
 %

Access to education through student transfers and attendance

Interim Check-in: WhatsApp Prototype

User Flow

1. User **fills in responses** directly into chat
2. SSL will **review responses** and **follow up** within 3 business days
3. Experience is **semi-automated** (ideally used after interim check-ins / reps done with SSL)

Agenda

Executive Summary

- ❖ Overview of Jackfruit
- ❖ Methodology
- ❖ Key Findings

Solution Deep Dive

- ❖ Impact Survey
- ❖ Interim Check-in
- ❖ School Engagement
- ❖ SSL Interactions

Next Steps

School Engagement: Overall Approach

1

Identified current gaps and pain points from 13 school director interviews

2

Prototyped school snapshot report to close the loop; **iterating with JFN teams** to finalize

3

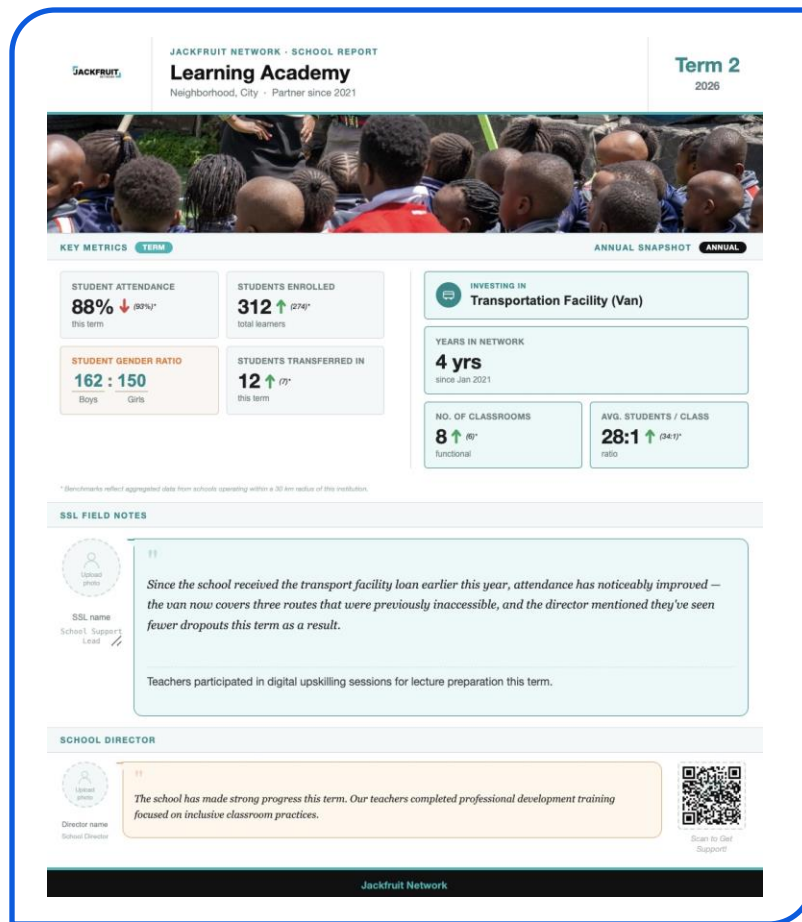

Ideating long-term school engagement recommendations

School Engagement: Snapshot Report Prototype

Establish AI link to interim check-in data collection to reduce workload

Currently benchmarked to schools within 30km radius

Gather qualitative testimonials from SSLs & SDs

Summary of progress per term

Highlight easy-to-digest metrics for marketing to parents

Incentivize schools to share quality data

Currently links to JFN website, can update to specific pages/portals

School Engagement: Metrics & Benchmarking

Category	Metric	Format	Frequency	Initial Data Source
Finances and Sustainability	Investing In	Text Input	Annual	Jackfruit DB
Access	Students Enrolled; Student Gender Ratio	Numerical Input	Each Term	Impact Survey
	Students Transferred In	Numerical Input	Each Term	Impact Survey
	Student Attendance	Percentage Input	Each Term	-
	Number of Classrooms; Avg. students/class	Numerical Input	Annual	Impact Survey
Relationship with JFN	Years in Network	Numerical Input	Annual	Jackfruit DB
	SSL Field Notes	Text Input	Each Term	On ground
	School Director Quote	Text Input	Each Term	On ground

Benchmarking Criteria

As schools receive a summary of KPIs from the interim check-ins, each metric will be **benchmarked against schools within a 30 km radius**

School Engagement: Long-Term Considerations

Community building

Network Newsletter

WhatsApp community network & interest led sub-groups

Upskilling

Teacher trainings available to all schools

Tech-enabling programs for schools without laptops/tablets

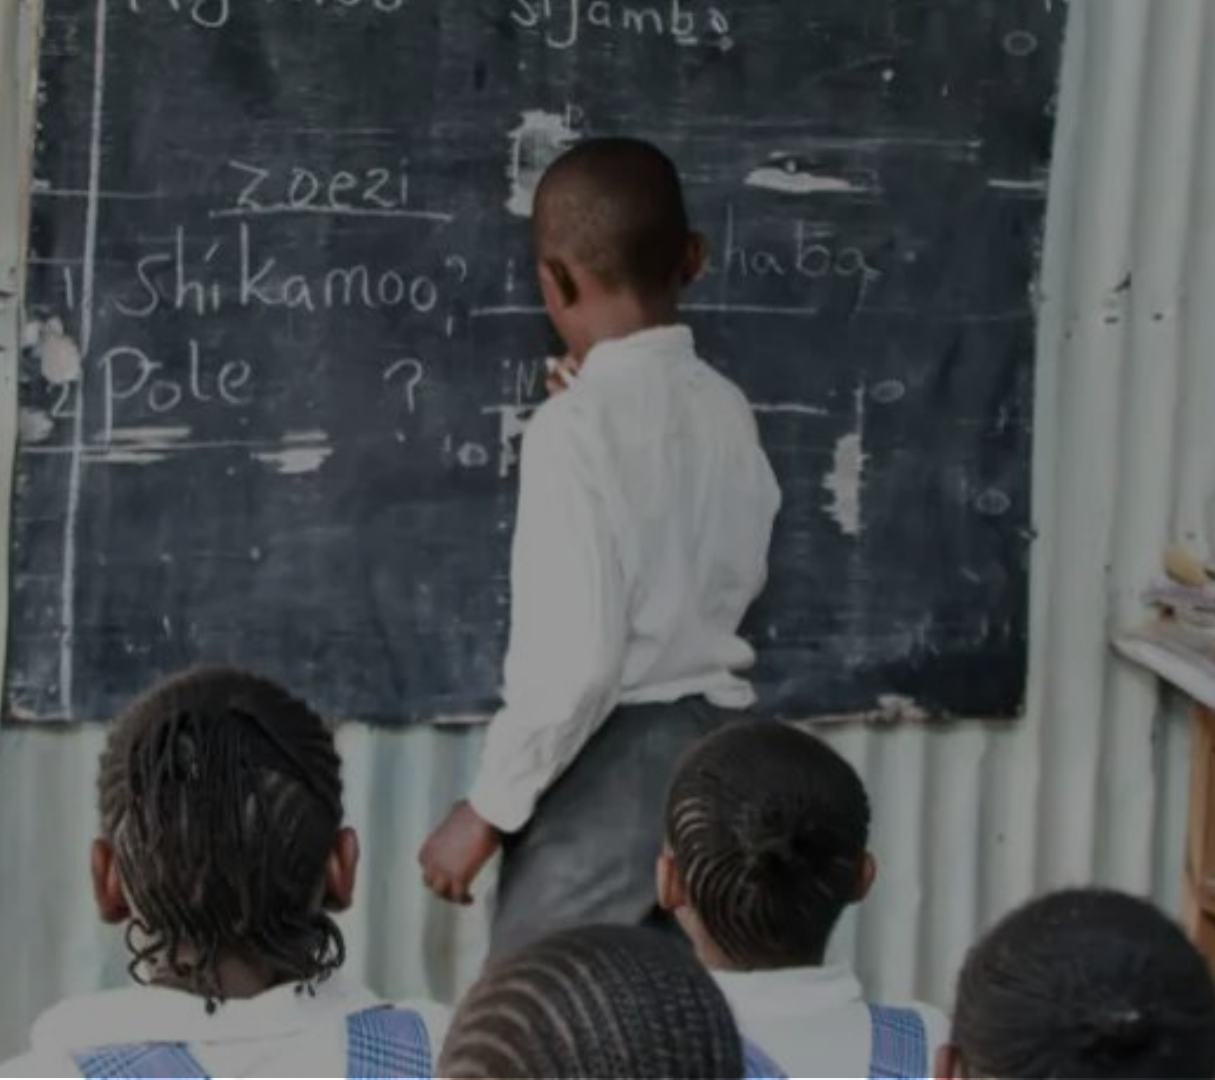

Peer Learning

Forum for School Directors to share ideas

Workshops/events for intra-school learning

Agenda

Executive Summary

- ❖ Overview of Jackfruit
- ❖ Methodology
- ❖ Key Findings

Solution Deep Dive

- ❖ Impact Survey
- ❖ Interim Check-in
- ❖ School Engagement
- ❖ SSL Interactions

Next Steps

SSL Interactions: Observation and Solutions

Proactiveness varies across SSLs

Best practices training for new joiners and refreshers for tenured employees

Roadblocks mentioned by schools are tracked informally

Create repository and encourage adaption to centralize the feedback loop

Need to incentivize quality data collection

Integrate metrics on collection rates & field notes provided by SSLs into their appraisal reviews

Agenda

Executive Summary

- ❖ Overview of Jackfruit
- ❖ Methodology
- ❖ Key Findings

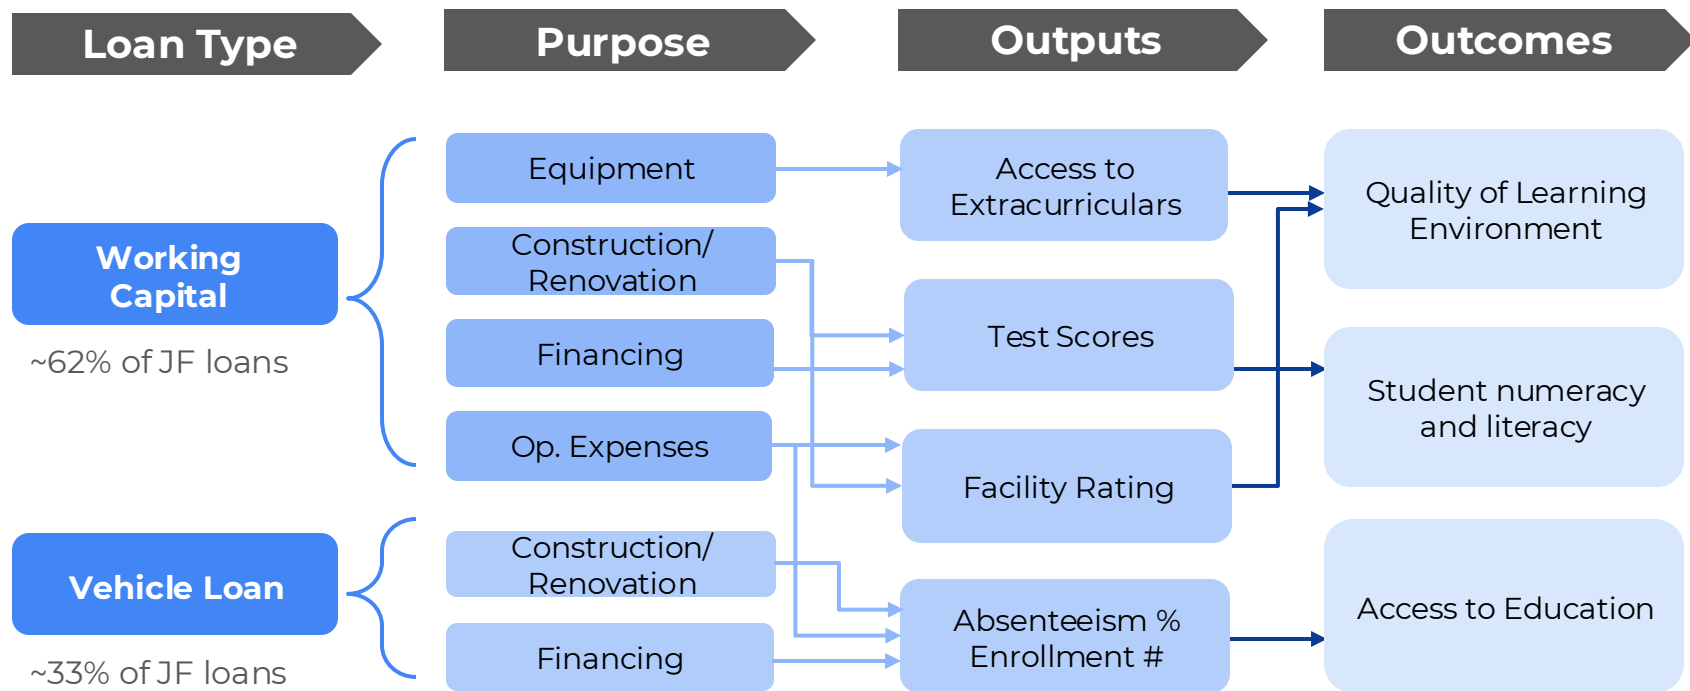

Solution Deep Dive

- ❖ Impact Survey
- ❖ Interim Check-in
- ❖ School Engagement
- ❖ SSL Interactions

Next Steps

Potential Data Analysis Methodologies

As Jackfruit collects data via the impact survey and the shorter interim per-term check-ins, ways to assess broad correlation of Jackfruit's impact to student outcome can be workshopped

Next Steps for Implementation

Near-term (1-3 month)

Conduct Internal testing for technical pain points and data integration

Tech and data team: refresh impact survey questions / format

Tech and data team: implement interim check-in survey

Marketing team: finalize school snapshot report design

SSL Leads: communicate changes to SSLs

Mid-term (3-6 month)

Set pilot period and define school cohorts for phased rollout

Pilot new impact survey

Pilot interim check-ins (during low season months)

Pilot school snapshot report

Gather feedback on initial pilots

Long-term (6 month+)

Standardize procedures for ongoing analysis

Standardize procedure to amend questions

Define systemic ways to determine contribution

Ideate further engagement incentives (e.g., newsletter)

Standardize feedback gathering; rethink incentives

General Considerations

Impact Survey

SSL Trainings on data collection, including data completeness, consistency, and accuracy

Regular review of impact survey to ensure continued relevance as Jackfruit's priorities evolve

Interim Check-ins

Incorporate into SSL **refresher training**

Prioritize **implementation** during low season months¹

May take **years** to see increase in contribution to learners' performance

School Engagement

SSL trainings for **snapshot report distribution** and **engaging schools** for Foundation initiatives

Establish **constant communication** on relevant trainings for staff and intra-school learning opportunities for students

¹February, April, May, August, September, December. Months when SSLs and schools are not busy administering fee collection.

Thank you!

Impact Survey: Prioritization Framework

Impact Survey questions were reviewed and scored based on the criteria outlined below:

	Low	Medium	High
Relevance	• Tangential to JFN's strategy or theory of change • Not clearly linked to network strength or impact	• Could inform decisions, but not critical • Supports understanding of context rather than core outcomes	• Directly tied to JFN's strategic priorities • Measures a core outcome or key performance indicator • Explicitly connected to leadership decisions
Actionability	• Interesting insight but no clear next step • Too broad to guide decision-making • Structural constraints make action difficult	• Offers directional guidance • Requires further analysis or follow-up questions • May influence prioritization rather than immediate change	• Direct line from data → decision → intervention • Can inform communication, investment, or engagement strategy • Enables measurable changes
Magnitude	• Affects a small subset of members • Limited strategic implications • Would influence minor tactical adjustments	• Could influence program design or member engagement strategy • Affects a meaningful segment of members • May shape resource allocation within a portfolio	• Could affect funding, programming, or strategic direction • Impacts school experience and measures outcomes • Influences long-term positioning

Interim Check-In: Overview of Options

Criteria	USSD	WhatsApp	SSL App
Set up cost	- Shared code: ~\$385 - One-time registration fee with telcos: ~\$115-\$270	Free – existing data infra	Free
Cost to scale	- Cost per session (1-5KSH) - Hosting provider monthly cost: \$38-\$115	Cost per message: \$0.004-\$0.01	No additional costs
Set up time	4 weeks	2-3 weeks	1 week
Data integration	1 month development needed	Existing integration	Existing integration
Ease of access	No wi-fi/data needed	Many schools communicate with SSLs via WhatsApp already	Easy access for SSLs; explore public in-app link for schools
Survey experience	20-30 seconds time out per question - No human facilitation available - Interface may feel clunky/long	- SSL has ability to step in 24-hr human conversation window	- App has prompting mechanism for SSLs - Customization available
